

Steven Mendez

Software Engineer | Full Stack & Backend

Managua, Nicaragua | stevenampaiz@gmail.com

linkedin.com/in/steven-mendez-dev | github.com/Steven-Mendez | stevenampaiz.com

Software engineer with 3+ years building production web applications, backend APIs and data pipelines.

Experience across Python, React/TypeScript and AWS, including SQL performance optimization, real-time product data and LLM/RAG features.

EXPERIENCE

WERN

Dec 2024 - Present

Freelance Software Engineer

Remote

Client engagements delivered through WERN:

Dupely

Dec 2025 - May 2026

Backend Engineer | Contract

- Built Python/FastAPI APIs and multi-vendor pipelines indexing 5K-10K products during beta, including product details, pricing history and availability from Amazon, Walmart and eBay.
- Implemented caching, provider fallbacks and Socket.IO events to serve real-time product updates to browser-extension and mobile clients.
- Integrated external data providers and maintained PostgreSQL, Redis and Qdrant storage on AWS within an approximately 10-engineer team.

E-Learning Platform (confidential client)

Dec 2024 - Nov 2025

Full Stack & AI Engineer | Contract

- Shipped a React/Next.js/TypeScript visual configuration tool enabling non-technical users to configure conversational-agent behavior.
- Integrated retrieval-augmented generation over learning content using pgvector and LangChain/LangGraph to ground assistant responses.
- Built Python/FastAPI and Django services and React/Next.js interfaces for the e-learning platform.

Universidad Nacional de Ingeniería (UNI)

Jan 2023 - Dec 2024

Systems Analyst | Full-time

Managua, Nicaragua

- Reduced a critical SQL Server report from approximately 20 minutes to 15-30 seconds and heavy queries from approximately 5 minutes to under 10 seconds across a decade of financial data.
- Maintained and modernized an ASP.NET/SQL Server budget system used by 400-700 staff, with peaks of 100-200 concurrent users.
- Mentored 5-10 interns in modern development practices and clean-code standards.

SELECTED PROJECT

Interview Agent | github.com/Steven-Mendez/interview-agent

- Built a three-agent voice interview application: one agent plans from a CV and job description, one conducts the interview through LiveKit, and one evaluates the transcript with supporting evidence.
- Implemented the React frontend and FastAPI backend with LangGraph/OpenAI orchestration and PostgreSQL persistence for plans, milestones, transcripts and evaluations.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, C#, SQL

Backend & Data: FastAPI, Django, ASP.NET, REST APIs, Socket.IO, PostgreSQL, SQL Server, Redis

Frontend & Cloud: React, Next.js, Tailwind CSS, AWS, Docker, CI/CD, Git

AI Applications: LLM/RAG, LangChain, LangGraph, pgvector, Qdrant, LiveKit

EDUCATION

Universidad Nacional de Ingeniería

Mar 2019 - Dec 2023

B.S. in Computer Engineering

ADDITIONAL INFORMATION

Certifications: Certified Big Data Consultant; Certified Big Data Professional - Arcitura Education, 2021

Languages: Spanish: Native | English: Professional (B2)
