

# Steven Mendez

Software Engineer | Full Stack & Backend

Managua, Nicaragua | [stevenampaiz@gmail.com](mailto:stevenampaiz@gmail.com)

[linkedin.com/in/steven-mendez-dev](https://linkedin.com/in/steven-mendez-dev) | [github.com/Steven-Mendez](https://github.com/Steven-Mendez) | [stevenampaiz.com](https://stevenampaiz.com)

Software engineer with 3+ years of experience building production web applications and backend APIs. Works across Python, React, .NET, and AWS, with experience in SQL optimization, data pipelines, and LLM/RAG integration.

## EXPERIENCE

**WERN** | Full Stack Engineer (Contract)

Jan 2025 - Present

Remote · Client engagement through WERN:

- Built Python APIs and React/Angular interfaces across 3-5 client codebases, with AWS deployments, Docker/Terraform infrastructure, and LLM/RAG integrations.

**Dupely** | Back End Developer (Contract through WERN)

Dec 2025 - Apr 2026

- Built FastAPI product and pricing endpoints for browser-extension and mobile clients, with pipelines using official Amazon, Walmart, and eBay APIs.
- Owned PostgreSQL schema design, migrations, and query performance; implemented caching for product data.

**US EdTech Client (confidential)**

Mar 2025 - Dec 2025

Full Stack & AI Engineer (Independent Consultant) | Self-employed

Remote

Direct client contract, concurrent with WERN.

- Built an LLM benchmark and evaluation harness covering 20-50 computer-use tasks; evaluation runs informed shipping decisions.
- Integrated LLM/RAG features into a learning management system using pgvector to retrieve learning content.
- Contributed production frontend and backend features in two-week sprints.

**Universidad Nacional de Ingeniería (UNI)**

Feb 2023 - Dec 2024

Full Stack Developer & Systems Analyst (.NET / React) | Full-time

Managua, Nicaragua

- Built a warehouse inventory system end to end with .NET and React.
- Maintained an ASP.NET/SQL Server budget system through two annual budget cycles; reduced its heaviest report's runtime from 6 minutes to 7-15 seconds.
- Mentored approximately 8 developers.

## SELECTED PROJECT

**Interview Agent** | [github.com/Steven-Mendez/interview-agent](https://github.com/Steven-Mendez/interview-agent)

- Built a three-agent voice interview application: a planner uses a CV and job description, an interviewer conducts the interview through LiveKit, and an evaluator assesses answers using transcript evidence.
- Implemented a React frontend and FastAPI backend with LangGraph/OpenAI orchestration and PostgreSQL persistence for plans, transcripts, and evaluations.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript/JavaScript, C#, SQL

**Backend & Data:** FastAPI, Django, Flask, ASP.NET, PostgreSQL, SQL Server, Redis, REST APIs

**Frontend:** React, Angular, Next.js

**Cloud & Tools:** AWS (Lambda, ECS, S3, RDS, SQS, CloudWatch), Docker, Terraform, CI/CD, Git

**AI Applications:** LLM/RAG integration, LangChain, LangGraph, pgvector, Qdrant, LiveKit

## EDUCATION

**Universidad Nacional de Ingeniería**

Mar 2019 - Dec 2023

Bachelor of Engineering (B.Eng.), Computer Engineering

## ADDITIONAL INFORMATION

**Certifications:** Certified Big Data Consultant (Arcitura Education, 2021); Certified Big Data Professional (Arcitura Education, 2021)

**Languages:** Spanish: Native | English: Full professional proficiency
